

Minimum System Requirements

Last updated July 30th, 2016

To use RateFast, you need a device with a modern web browser and an internet connection. That's it.

RateFast is compatible with a wide variety of devices and operating systems because it is a web application—a piece of software that runs inside your browser, and does not require any installations on your device.

However, as with all web applications, your RateFast experience will benefit from a strong internet connection and a fast device.

Devices and operating systems

At this time, RateFast is optimized for Windows and Mac OS X desktop computers. However, RateFast can be used on a large range of devices, including mobile phones and tablets running Android and Apple iOS.

Web Browsers

RateFast officially supports the most recent two versions of the most popular desktop web browsers: Google Chrome, Safari, Internet Explorer, Firefox, and Edge.

However, in practice, you may be able to use RateFast on older versions of these browsers, and less common web browsers, such as Opera and Vivaldi.

We want to hear from you!

Not sure if your system can run RateFast?

Believe that RateFast is incompatible with your favorite device or web browser?

Send an email to info@rate-fast.com and we'll get back to you.
